**DETAILED ACTION**

1. The Amendment filed by Applicant on 08/05/05 has been entered.
2. Claim 28 has been canceled.
3. New claims 58-61 have been added.

***Response to Amendment/Arguments***

4. Applicant's amendment and arguments filed on 08/05/05 have been fully considered and they are found unpersuasive.
5. The rejection of claims 33-61 under 35 U.S.C. 103(a) as being unpatentable over Ninomiya et al., EP 0 930 339 A1 (hereinafter "Ninomiya I") in view of Ninomiya et al., EP 0 892 006 A2 (hereinafter "Ninomiya II") is withdrawn.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1713

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

8. Claims 33-61 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ninomiya et al., EP 0 930 339 A1 (hereinafter "Ninomiya I") in view of Ninomiya et al., EP 0 892 006 A2 (hereinafter "Ninomiya II") and Dombroski et al., U.S. Patent No. 4,547,329 (hereinafter "Dombroski"). Ninomiya teaches a resin composition comprising a sponified ethylene-vinyl acetate copolymer, a boron compound, acetic acid and acetate salt and phosphoric acid compound. Ninomiya I differs from the present invention in that Ninomiya I does not have the specific conditions for the extrusion processes. Ninomiya II teaches in

Art Unit: 1713

analogous art processes for preparing EVA under extrusion conditions. See Ninomiya II, page 9 and Examples. Dombrowski teaches adjusting the amount of water in the extruder. See Dombrowski col. 4 line 49 through col. 5, line 13; Example 2 & 4. In view of Ninomiya II and Dombrowski, one having an ordinary skill in the art would be motivated to modify Ninomiya I by using the extrusion conditions. Such modification would be obvious because one would expect that the processes of making EVA as taught by Ninomiya I would be similarly useful and applicable to extrusion conditions as taught in Ninomiya II and Dombrowski.

#### **Conclusion**

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

10. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened

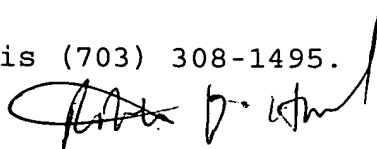

Art Unit: 1713

statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
